Make Your First Million

Sounds like a pie-in-the-sky dream to many, but you really can become a millionaire if you invest regularly and wisely, but most importantly stay out of debt! The fact is most millionaires will tell you that it's tougher to make your first million than your next ten, said Victoria Woods, CSA and CEO of ChappelWood Financial Services.

Woods has just published her first book titled, "It's All About the \$Money, Honey!" She offers up the following advice for putting away that first million:

Diva Diamond 1

Eliminate Debt

Best way to eliminate debt is to stop growing it. It's like digging a hole. You need to stop digging!

Diva Diamond 2

Don't Be Emotional

A disciplined approach to investing is always better than an emotional one.

Diva Diamond 3

Build a Successful Investment Strategy

Take a long-term approach as opposed to chasing short-term winners. Avoid overvalued investments, and focus on undervalued ones instead.

Diva Diamond 4

Enlist the Right Help

You wouldn't have your mechanic color your hair.

Choose the right professionals.

Who do you need on your team?

You don't just need to know the questions to ask, you need to know the answers. Woods gives readers both in her new book.
